

I don't know who will see this but
I think I'm a lesbian.

My attraction towards men, even from
~~the~~ young age with Joe Jonas,
I feel as if ~~to~~ these feelings I have
are forced and is a result of
comp het. When I look men,
even the ones I thought I idolized,
I feel nothing romantic or sexual.
I simply admire them & want to
be their friend. And maybe some
fictional characters but no one will
makes me feel the way I do
about women. I'm scared. I'm
scared that this isn't real, and
maybe I am bi, ~~bi~~ and that's
ok. But I would ~~not~~ rather
~~not~~ know then live in this darkness.
I'm so uncertain or maybe I'm
in denial. I just feel so
LST.

Maybe this is a phase or something

Maybe in a month, I'll be admiring
and simping over men again...
or idk.

Would I have to come out
again? It went SO WELL the
first time, it's not like mom
treats me different or singles me
out FOR NOTHING, ~~not~~ so
yes! Let's tell her I'm probably
never gonna marry a man

~~MOM~~ A M I, gonna marry a
man? I can't ever think that
far ahead

I just have so many of these
feelings that are everywhere
and IDK ~~what~~ who I am
anymore. I feel like I'm faking
being bi but what if I'm
faking being lesbian?

IDK any lesbians WAIT
FUCK ~~IF~~ ~~IF~~ ak I
might text her.
